

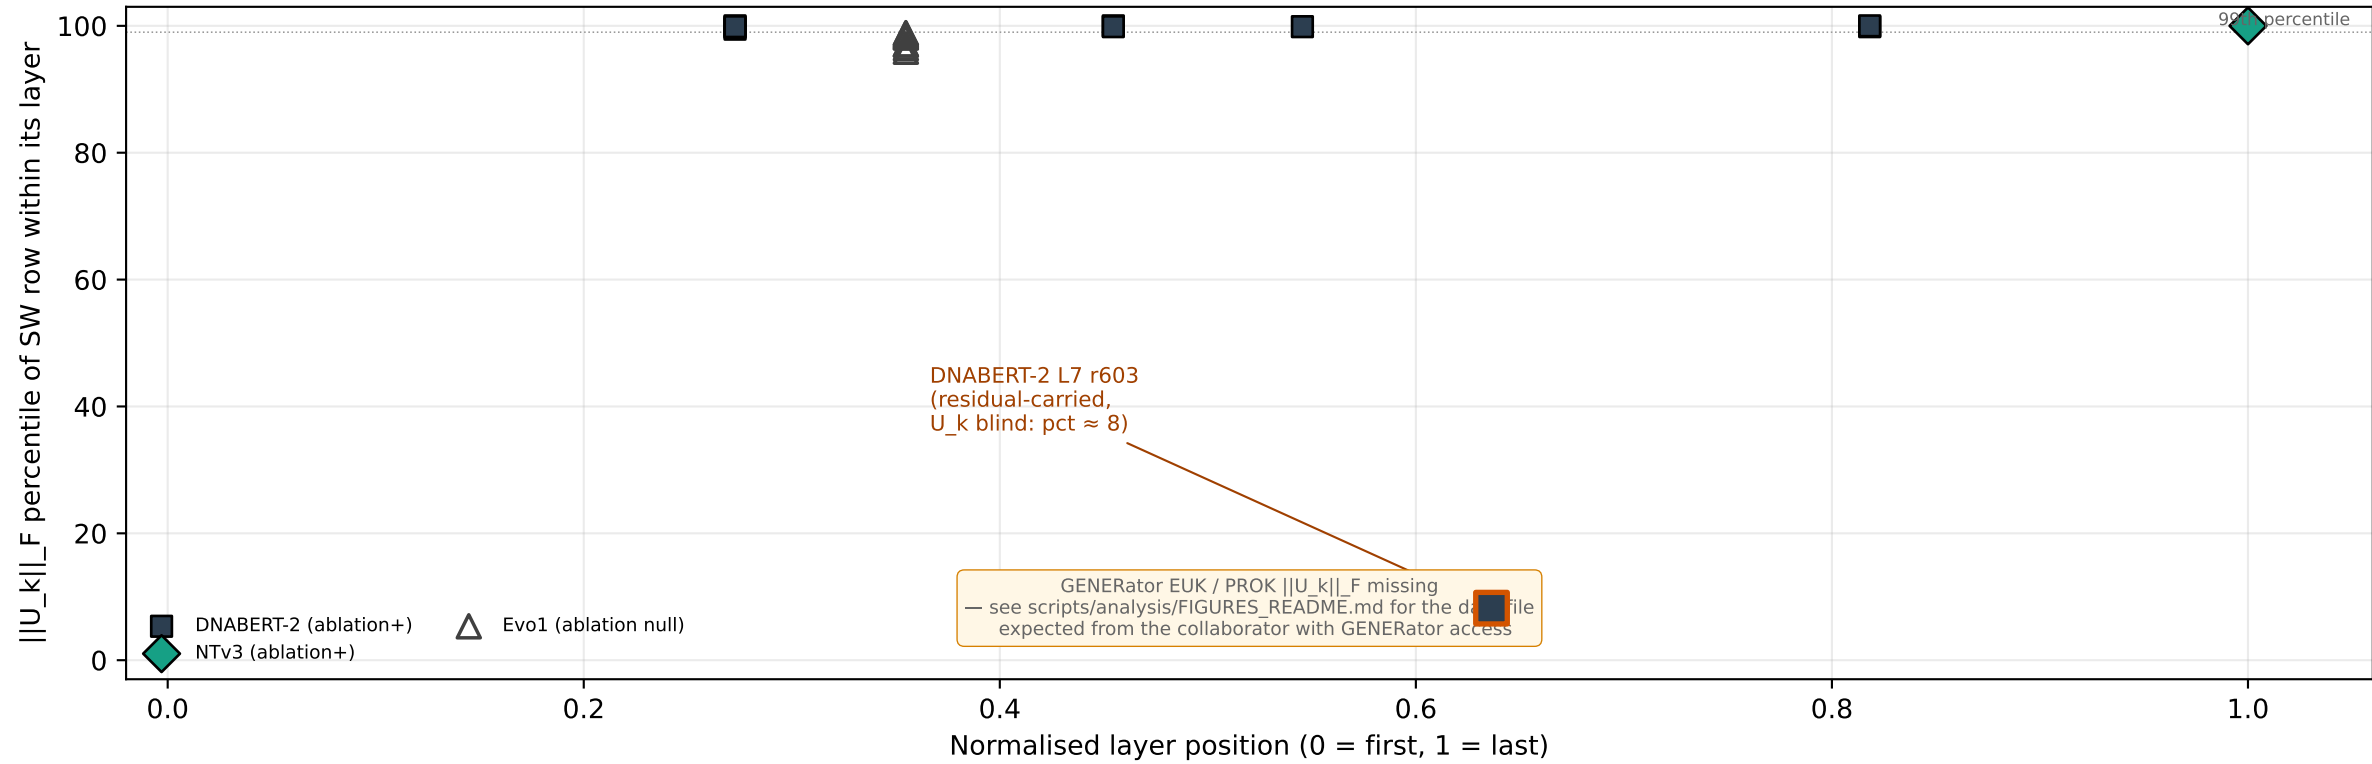

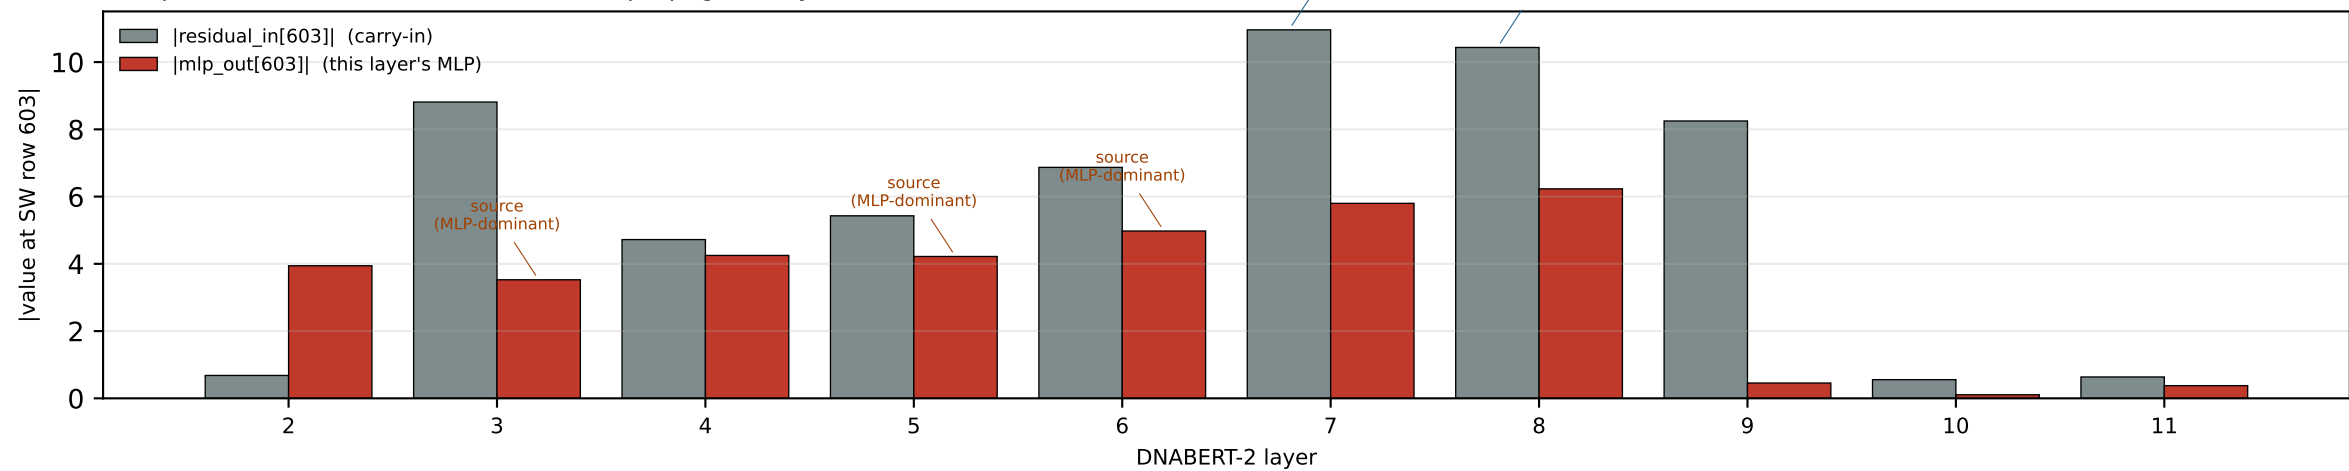

Figure 2 (panels E & F) — Cross-architecture $||U_k||_F$ percentile + Residual-stream attribution

E. Cross-architecture $||U_k||_F$ percentile of detected SW rows
 Filled = ablation-positive, Open = ablation-null

F (top). DNABERT-2 row 603 — source vs propagator layers

F (bottom). Evo1 row 3776 — residual trajectory across all 32 blocks (dtype=float32)
