

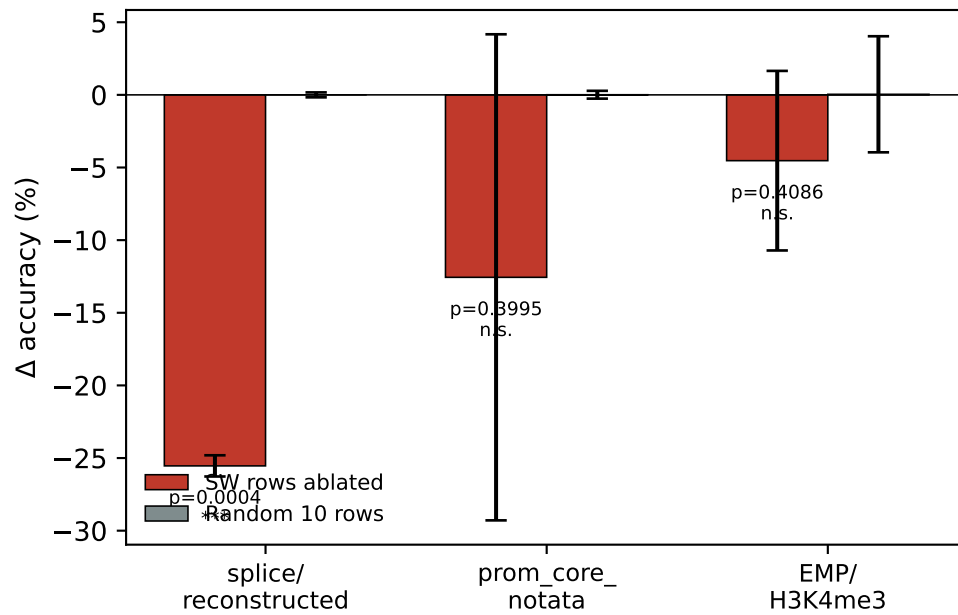

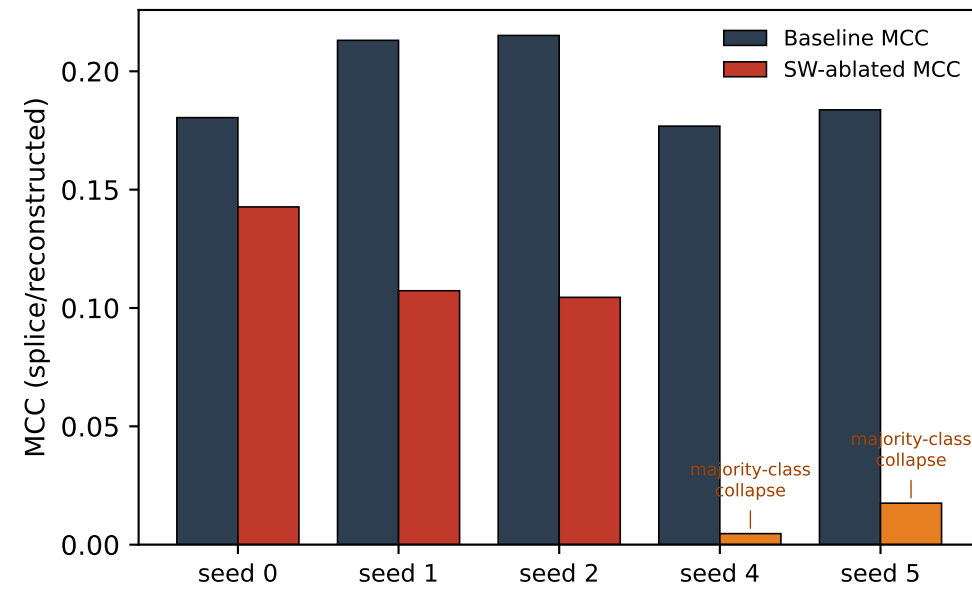

Figure 4 — GUE Functional Consequences of SW Ablation

A. DNABERT-2 GUE Δ acc — SW vs random control (3 seeds, mean $\pm$ std)

B. NTV3 splice — baseline vs SW-ablated MCC (5 seeds)
 Δ MCC = -0.119 ± 0.055 , $t=-4.86$ $p=0.0083$, sign-neg 5/5

C. DNABERT-2 per-row Δ acc on splice/reconstructed
